Protein Drink Mixing Machine

FCV-NCF-7N(V32) Protein Drink Mixing Machine

TECHNICAL OVERVIEW | FCV-NCF-7N(V32)

This protein-drink format uses automatic cup dispensing and stainless-steel in-cup mixing. The page heading identifies NCF-7 N(V 32)(BA 02), while its detailed parameter graphic names P 700. The pictured P 700 schedule specifies four 4 L and five 2 L ingredient canisters,180 cups and a 20 L wastewater container. Keep that schedule separate from the heading identity until the manufacturer confirms the relationship. Optional chilled water is not standard equipment.

Model summary

FCV catalogue reference	FCV-NCF-7N(V32)
Category	Protein Drink Mixing Machine
Screen	Not verified
Chilled-water system	Optional 1-7°C system

Published source configurations

These source descriptions are kept separate. They do not establish that every value belongs to one supplied unit; the FCV quotation identifies the accepted configuration.

Configuration 1

Source model: FCV-NCF-7N(V32) / 1

Original page parameters are retained as their own source schedule. Compare any additional layout evidence separately.

Chilled-water system	Optional 1-7°C system

Configuration 2

Source model: FCV-NCF-7N(V32) / 2

Official heading identifies FCV-NCF-7N(V32)(BA02); its parameter graphic instead identifies FCV-NCF-7N(V32). The FCV-NCF-7N(V32) graphic specifies 4 L x 4 plus 2 L x 5 ingredient canisters, automatic cup dispensing, stainless-steel in-cup mixing and automatic mixing-system cleaning.

Powder storage - FCV-NCF-7N(V32) artwork only	Four 4 L and five 2 L canisters are explicit for the pictured FCV-NCF-7N(V32) configuration. No fixed ingredient-to-canister assignment is published.
Cup and water systems	The FCV-NCF-7N(V32) graphic lists 180 cups, bottled/direct water and one 20 L wastewater container.
Mixing circuit	The linked page describes stainless-steel in-cup mixing and rinsing after each dispense.

Configuration 3

Source model: FCV-NCF-7N(V32) / 3

FCV-NCF-7N(V32) and FCV-NCF-7N(V32)(BA02) are the same supplied chassis.

Dimensions (H × W × D)	1830 × 620 × 710 mm
Weight	173 kg
Canisters	4 × 4 L + 5 × 2 L
Cups	180
Wastewater	20 L × 1

Configuration and quotation

Specifications reflect the cited source configuration. Optional accessories and alternative configurations are not included as standard unless explicitly identified in the quotation. Confirm payment hardware, power requirements, installation access and service scope for the intended site. No price, stock quantity, delivery date or certification is implied by this overview.

Configuration details to confirm

A numeric screen size has not been verified; model suffixes are not used as screen evidence.

FCV-NCF-7N(V32)(BA02) heading versus FCV-NCF-7N(V32) parameter identity is unresolved. Keep numeric FCV-NCF-7N(V32) storage layout as a named source configuration, not a flat specification of every NCF-7N unit.

Optional chilled-water configuration must not become a standard installation claim.

Protein-drink mixing and ingredient layout

Official heading identifies FCV-NCF-7N(V32)(BA02); its parameter graphic instead identifies FCV-NCF-7N(V32). The FCV-NCF-7N(V32) graphic specifies 4 L x 4 plus 2 L x 5 ingredient canisters, automatic cup dispensing, stainless-steel in-cup mixing and automatic mixing-system cleaning.

Storage / equipment zone	Documented source layout
Powder storage - FCV-NCF-7N(V32) artwork only	Four 4 L and five 2 L canisters are explicit for the pictured FCV-NCF-7N(V32) configuration. No fixed ingredient-to-canister assignment is published.
Cup and water systems	The FCV-NCF-7N(V32) graphic lists 180 cups, bottled/direct water and one 20 L wastewater container.
Mixing circuit	The linked page describes stainless-steel in-cup mixing and rinsing after each dispense.

- Select a configured drink recipe.
- The machine meters ingredients into an automatically dispensed cup and mixes in the cup.
- Collect the prepared drink; the documented mixing system then runs its rinse cycle.

Configuration details

Prepared 27 November 2026 for the FCV product catalogue. Confirm the supplied configuration and site requirements with the FCV team before ordering.

Configuration confirmation

Some equipment configuration details require further confirmation. The catalogue entry is not proof of current FCV stock or a completed site-specific technical acceptance. Unknown fields remain unverified.

Product information

This FCV technical overview describes the listed equipment configuration. The written quotation confirms the machine, accepted product packs, accessories and service scope supplied for your location.

Confirm before purchase

Ask FCV for the exact model and revision, supplied options, current technical sheet, site suitability, warranty, maintenance scope and written commercial terms. Product images, where present, are conceptual branded renders rather than installation evidence.
