PPE Vending Machine

FCV-ZK(22SP)+BLH-19S PPE Vending Machine

TECHNICAL OVERVIEW | FCV-ZK(22SP)+BLH-19S

This locker arrangement provides 19 independent selections for PPE issue and product-to-door planning. Three taller upper compartments sit above four rows of four smaller compartments, beside a separate control tower. The preferred named technical schedule specifies a 21.5-inch touch screen, a 1940 mm high cabinet, a 1080 mm locker plus 397 mm controller width, and 320 mm depth. These values describe the cited configuration; they do not establish a fixed number of products that can be loaded into each compartment. The customer interface and locker storage are separate sections. Confirm the clear opening, internal compartment space and door release for the intended package before assigning products. Product examples in the supplier artwork do not establish permission to sell regulated goods or universal compatibility.

Model summary

FCV catalogue reference	FCV-ZK(22SP)+BLH-19S
Category	PPE Vending Machine
Screen	21.5 inch
Locker selections	19
Dimensions	H 1940 × W (1080 + 397) × D 320 mm
Touch screen	21.5 inch
Power supply	AC 100-240 V, 50 Hz

Published source configurations

These source descriptions are kept separate. They do not establish that every value belongs to one supplied unit; the FCV quotation identifies the accepted configuration.

Configuration 1

Source model: FCV-ZK(22SP)+BLH-19S / 1

This named technical schedule defines the public dimensions, electrical supply, screen and selection count. Supplier commercial promises are not adopted as FCV inclusions.

Locker selections	19
Dimensions	H 1940 × W (1080 + 397) × D 320 mm
Touch screen	21.5 inch
Power supply	AC 100-240 V, 50 Hz

Configuration and quotation

Specifications reflect the cited source configuration. Optional accessories and alternative configurations are not included as standard unless explicitly identified in the quotation. Confirm payment hardware, power requirements, installation access and service scope for the intended site. No price, stock quantity, delivery date or certification is implied by this overview.

Configuration details to confirm

Technical facts follow the explicitly named schedule cited in sourceConfigurations; optional payment integration and package compatibility require the selected configuration.

The second page links a 27S brochure despite its 19S page table; that brochure is not evidence for this record. Its newer 19S graphic is a separately identified source configuration.

Locker compartment layout and loading checks

Three taller upper compartments sit above four rows of four smaller compartments, beside a separate control tower.

Storage / equipment zone	Documented source layout
Documented locker compartments	Three taller upper compartments sit above four rows of four smaller compartments, beside a separate control tower.

- Match the supplied machine identity and door map to the cited source configuration before assigning products.

- Keep the three taller upper positions separate from the smaller lower compartments when preparing the product-to-door map.

- The exact page table specifies normal temperature. Do not plan temperature-controlled goods without a separately confirmed configuration.

- Measure the actual clear door opening and internal compartment space, then check the intended package and door closure; source selection counts are not a verified refill quantity or weight limit.

Configuration details

Prepared 27 November 2026 for the FCV product catalogue. Confirm the supplied configuration and site requirements with the FCV team before ordering.

Product information

This FCV technical overview describes the listed equipment configuration. The written quotation confirms the machine, accepted product packs, accessories and service scope supplied for your location.

Confirm before purchase

Ask FCV for the exact model and revision, supplied options, current technical sheet, site suitability, warranty, maintenance scope and written commercial terms. Product images, where present, are conceptual branded renders rather than installation evidence.
