Liquid Refill Vending Machine

FCV-M197 Liquid Refill Vending Machine

TECHNICAL OVERVIEW | FCV-M197

This liquid-refill application shows an upper customer display, a separate payment/control section and a recessed filling area for a customer's container. The source illustrates a container being positioned, the liquid being purchased and dispensing at the front opening. Milk, disinfectant and laundry detergent are shown as separate application examples; those examples do not establish that one installed liquid circuit can handle every formulation. This page does not provide a model-coded parameter sheet, tank volumes, measured dose, electrical schedule or cabinet dimensions. Its photograph is also used for other liquid-refill listings, including a separately coded NLQ configuration. Shared imagery alone is insufficient to transfer that other listing's internal capacity or installation figures.

Model summary

FCV catalogue reference	FCV-M197
Category	Liquid Refill Vending Machine
Screen	Confirm the supplied display configuration
Format	Container-based liquid refill dispensing
Customer access	Recessed front filling area

Documented equipment features

- Upper customer display and separate front payment/control area.
- Recessed filling area for a customer container.

Published source configurations

These source descriptions are kept separate. They do not establish that every value belongs to one supplied unit; the FCV quotation identifies the accepted configuration.

Configuration 1

Source model: FCV-M197 / 1

The exact accepted page documents external container dispensing but no model-coded installation or internal storage schedule.

Application format	Container-based liquid refill
Illustrated examples	Milk, disinfectant and laundry detergent configurations
Operation	Position a container, purchase the product and dispense into the container

Illustrative FCV-branded concept render. Verify the quoted physical configuration.

Configuration and quotation

Specifications reflect the cited source configuration. Optional accessories and alternative configurations are not included as standard unless explicitly identified in the quotation. Confirm payment hardware, power requirements, installation access and service scope for the intended site. No price, stock quantity, delivery date or certification is implied by this overview.

Configuration details to confirm

Published figures remain attached to their named source configuration. Payment equipment, provider availability, software licensing and service responsibilities are specified in the quotation.

Source photographs establish visual provenance. A shared photograph or model-code family does not demonstrate a unique chassis or prove that separate configurations have identical specifications.

The named discrepancies or missing exact-source information described here remain unresolved for the supplied configuration.

External liquid-refill customer zones

Only externally documented zones are presented; no tank volume or internal channel count is inferred.

External equipment zone	Documented source layout
Customer display	The exact source photo shows an upper customer-facing display.
Payment and controls	A separate narrow section contains payment hardware and a small control/display interface.
Container area	A recessed front filling area is visible below the controls.

Configuration details

Prepared 27 November 2026 for the FCV product catalogue. Confirm the supplied configuration and site requirements with the FCV team before ordering.

Configuration confirmation

Some equipment configuration details require further confirmation. The catalogue entry is not proof of current FCV stock or a completed site-specific technical acceptance. Unknown fields remain unverified.

Product information

This FCV technical overview describes the listed equipment configuration. The written quotation confirms the machine, accepted product packs, accessories and service scope supplied for your location.

Confirm before purchase

Ask FCV for the exact model and revision, supplied options, current technical sheet, site suitability, warranty, maintenance scope and written commercial terms. Product images, where present, are conceptual branded renders rather than installation evidence.
