Blind Box Vending Machine

FCV-M174 Blind Box Vending Configuration - 22 inch

TECHNICAL OVERVIEW | FCV-M174

This blind-box vending format separates its top advertising lightbox from the 22-inch touchscreen used for shopping and interactive advertising. The labelled source illustration identifies pusher delivery, a vertical and horizontal elevator, and a middle pickup door. The pickup door is described as automatic and anti-pinching. The merchandise window and collection position give this source configuration a different presentation from versions with a lower collection hatch. The inspected graphic does not print a confirmed exact model code or a numeric shelf-and-slot table. Its configuration guide therefore uses the named mechanisms and access points without assigning a tray count from the number of products visible in the illustration.

Model summary

FCV catalogue reference	FCV-M174
Category	Blind Box Vending Machine
Screen	22 inch

Published source configurations

These source descriptions are kept separate. They do not establish that every value belongs to one supplied unit; the FCV quotation identifies the accepted configuration.

Configuration 1

Source model: FCV-M174 / 1

Published source configuration; preserve the named variant and stated capacity conditions.

Touchscreen	22-inch touchscreen
Header	Advertising lightbox
Slot mechanism	Pusher
Delivery mechanism	Vertical and horizontal elevator
Pickup door	Middle pickup door; anti-pinching automatic door

Illustrative FCV-branded concept render. Verify the quoted physical configuration.

Configuration and quotation

Specifications reflect the cited source configuration. Optional accessories and alternative configurations are not included as standard unless explicitly identified in the quotation. Confirm payment hardware, power requirements, installation access and service scope for the intended site. No price, stock quantity, delivery date or certification is implied by this overview.

Configuration details to confirm

The source explicitly describes blind-box retail hardware; the former Micro Market category and name are incorrect.

The 22-inch selection touchscreen is separately labelled from the advertising lightbox and physical merchandise display.

No exact coded parameter table, installation dimensions, mass, electrical schedule or PDF link is established.

The source shows related cabinet/display-case formats. Do not transfer dimensions or capacity from another blind-box record.

The annotated narrow vending module shows a middle pickup door. The primary wide image adds a right display case; no assembly dimensions or numeric shelf count are established.

Explore the documented storage and delivery format

The blind-box gallery documents the named exterior and delivery mechanisms; a model-matched basic installation schedule is not published.

Storage / equipment zone	Documented source layout
Slot mechanism	Pusher
Delivery mechanism	Vertical and horizontal elevator
Pickup door	Middle pickup door; anti-pinching automatic door

- Distinguish the advertising lightbox from the 22-inch customer touchscreen.
- Identify the pusher mechanism and vertical and horizontal elevator.
- Locate the middle automatic pickup door.
- Record the selected merchandise arrangement without deriving a shelf count from the illustrated products.

Configuration details

Prepared 27 November 2026 for the FCV product catalogue. Confirm the supplied configuration and site requirements with the FCV team before ordering.

Configuration confirmation

Some equipment configuration details require further confirmation. The catalogue entry is not proof of current FCV stock or a completed site-specific technical acceptance. Unknown fields remain unverified.

Product information

This FCV technical overview describes the listed equipment configuration. The written quotation confirms the machine, accepted product packs, accessories and service scope supplied for your location.

Confirm before purchase

Ask FCV for the exact model and revision, supplied options, current technical sheet, site suitability, warranty, maintenance scope and written commercial terms. Product images, where present, are conceptual branded renders rather than installation evidence.
