Blind Box Vending Machine

FCV-M184 Blind Box Pusher Vending Configuration - 22 inch

TECHNICAL OVERVIEW | FCV-M184

The Smart Pocket Mart source page illustrates a blind-box and toy vending cabinet with pusher dispensing and an elevator collection mechanism. Its feature image expressly states 77 slots arranged across seven layers with eleven slots per layer. This is a slot layout, not a piece count for every box size. The same graphic lists a 22-inch touch interface, 1.5 mm cabinet plate, basket-style pickup mechanism and an automatic collection door. The annotated image describes vertical and horizontal elevator positioning. These details distinguish the format from a self-checkout micro-market or an open-access refrigerator. A loading plan should verify each box's width, depth, weight and stability on the pusher lane, then test elevator transfer and pickup clearance before accepting a stock arrangement.

Model summary

FCV catalogue reference	FCV-M184
Category	Blind Box Vending Machine
Screen	22 inch

Published source configurations

These source descriptions are kept separate. They do not establish that every value belongs to one supplied unit; the FCV quotation identifies the accepted configuration.

Configuration 1

Source model: FCV-M184 / 1

Technical details read from official source images. The actual supplied configuration requires matching confirmation.

Application	Blind-box/toy retail vending example on smart-pocket-mart source page
Customer interface	22-inch interactive touch/advertisement display
Mechanism	Pusher slot with vertical/horizontal elevator auto-positioning
Collection	Middle pickup door with source-described anti-pinch automatic door
Published storage layout	77 slots:7 layers × 11 slots (source feature image)
Steel sheet	1.5 mm source-described cabinet plate

Illustrative FCV-branded concept render. Verify the quoted physical configuration.

Configuration and quotation

Specifications reflect the cited source configuration. Optional accessories and alternative configurations are not included as standard unless explicitly identified in the quotation. Confirm payment hardware, power requirements, installation access and service scope for the intended site. No price, stock quantity, delivery date or certification is implied by this overview.

Configuration details to confirm

The accepted Smart Pocket Mart page actually illustrates blind-box retail vending, not an open micro-market or self-checkout store.

The actual feature graphic explicitly states 77 slots across 7 layers × 11 positions and a 22-inch touchscreen. No model-suffix inference is used.

The annotated image labels pusher/XY delivery, a middle automatic pickup door and separate advertising lightbox.

No exact manufacturer code, installation footprint, mass, electrical schedule or PDF is published. Shared-looking cabinet imagery does not establish an OEM code.

Documented layout and loading checks

The source feature image states seven layers of eleven slots, 77 slots total. These are positions, not quantities of boxes behind each selection.

Storage / equipment zone	Documented source layout
Product layers	Seven layers with 11 slots each; 77 slots total. Piece quantities and accepted blind-box packaging require dispensing tests.

- Measure blind-box packs for the accepted eleven-slot layer arrangement.
- Test pusher release and elevator basket transfer.
- Confirm pickup-door clearance and the final piece allocation.

Configuration details

Prepared 27 November 2026 for the FCV product catalogue. Confirm the supplied configuration and site requirements with the FCV team before ordering.

Configuration confirmation

Some equipment configuration details require further confirmation. The catalogue entry is not proof of current FCV stock or a completed site-specific technical acceptance. Unknown fields remain unverified.

Product information

This FCV technical overview describes the listed equipment configuration. The written quotation confirms the machine, accepted product packs, accessories and service scope supplied for your location.

Confirm before purchase

Ask FCV for the exact model and revision, supplied options, current technical sheet, site suitability, warranty, maintenance scope and written commercial terms. Product images, where present, are conceptual branded renders rather than installation evidence.
